## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of claims 1-20 filed on 08/28/03 is acknowledged. Examiner withdraws the restriction requirement for claims 25-32. The traversal is on the ground(s) that the search and examination of the entire application could be made without serious burden. This is not found persuasive because as indicated in the restriction requirement the product as claimed can be made by another and materially different process and inventions are unrelated as they have different modes of operation, different functions, or different effects.

The requirement for claims 21-24 and 33-46 is still deemed proper and is therefore made FINAL.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Holly N. Sy, Reg. No. 50,212 on 09/25/03.

The application has been amended as follows: claims 21-24 and 33-46 are canceled; in claim 1, line 10 delete [is], in claim 28, line 4 delete first [the] and insert a; in the specification Page 37, line 3 from the bottom of the page delete [14a] and insert 14s.

### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the allowability, at least in part, resides in the specific structure of the power distribution device for a vehicle, which includes in combination with other claimed elements input and output terminals being formed of metallic plates and input and output terminals are arranged on the same plane perpendicular to a direction of the thickness of the metallic plates; regarding to claim 25, it is, in combination with other claimed elements, a conductor board having an input terminal connected to the semiconductor switching elements electrically connected to the first current flowing terminal and having the conductor board thermally connected to the heat radiation member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
